Hi, I'm a 24-year-old woman named Karina, and I'm a very happy and outgoing person. I'm passionate about sports, music, IT, and customer service. I'm a polite individual currently looking for a student job, as I'm studying to become a Computer Science AP Graduate in Vejle. I have my own car and a driver's license. I'm flexible with working hours and shifts, quick to learn, and adapt easily to new tasks.

Not only that, but I genuinely love learning new things. Although my grades might not be the best, I'm confident in my abilities. I've never had to retake an exam, and I've mastered the basics, but I'm eager to improve and expand my skills. I'm not someone who gives up, especially when it comes to learning. I go to school to gain knowledge, not to show off.
